

Year 9		Curriculum Checkpoints: What do students know and what can they do?			
GCSE Economics Term 1		Developing	Securing	Mastering	Excelling
AF1	Introduction to Economics and the economic problem	I have knowledge of: the economic problem, main economic groups, scarcity, factors of production, CBA and making choices.	I can analyse and apply at least one example to all of the following: the economic problem, main economic groups, scarcity, factors of production, CBA and making choices.	I can analyse and apply 2 -3 examples to all fo the following: the economic problem, main economic groups, scarcity, factors of production, CBA and making choices.	I can confidently analyse and apply in relation to all of the following: the economic problem, main economic groups, scarcity, factors of production, CBA and making choices.
AF2	The role of markets in allocating goods and services	I have knowledge of: how markets work to enable the allocation of resources, Economic sectors, specialisation and change.	I can analyse and apply at least one example to all of the following: how markets work to enable the allocation of resources, Economic sectors, specialisation and change.	I can analyse and apply 2 -3 examples to all fo the following: how markets work to enable the allocation of resources, Economic sectors, specialisation and change.	I can confidently analyse and apply in relation to all of the following: how markets work to enable the allocation of resources, Economic sectors, specialisation and change.
AF3	The price mechanism and intermarket relationships	I have knowledge of: How prices are determined. Demand and demand curve movement, supply and supply curve - shift and movement , equilibrium and interaction of demand and supply, intermarket relationships.	I can analyse and apply at least one example to all of the following: How prices are determined. Demand and demand curve movement, supply and supply curve - shift and movement , equilibrium and interaction of demand and supply, intermarket relationships.	I can analyse and apply 2 -3 examples to all fo the following: How prices are determined. Demand and demand curve movement, supply and supply curve - shift and movement , equilibrium and interaction of demand and supply, intermarket relationships.	I can confidently analyse and apply in relation to all of the following: How prices are determined. Demand and demand curve movement, supply and supply curve - shift and movement , equilibrium and interaction of demand and supply, intermarket relationships.
GCSE Economics Term 2		Developing	Securing	Mastering	Excelling
AF1	The price mechanism and intermarket relationships	I have knowledge of: How prices are determined - Price Elasticity of demand and Price Elasticity of Supply	I can analyse and apply at least one example to all of the following: How prices are determined - Price Elasticity of demand and Price Elasticity of Supply	I can analyse and apply 2 -3 examples to all of the following: How prices are determined - Price Elasticity of demand and Price Elasticity of Supply	I can confidently analyse and apply in relation to all of the following: How prices are determined - Price Elasticity of demand and Price Elasticity of Supply

AF2	Production, cost, revenue and profit 1	I have knowledge of : Production, Cost, Revenue and Profit Production, role of producer and productivity, calculations of costs, revenue and profit	I can analyse and apply at least one example to all of the following: Production, Cost, Revenue and Profit Production, role of producer and productivity, calculations of costs, revenue and profit	I can analyse and apply 2 -3 examples to all of the following: Production, Cost, Revenue and Profit Production, role of producer and productivity, calculations of costs, revenue and profit	I can confidently analyse and apply in relation to all of the following: Production, Cost, Revenue and Profit Production, role of producer and productivity, calculations of costs, revenue and profit
AF3	Production and economies of scale	I have knowledge of : the concept of economies of scale. I know the different types of economies of scale and how they impact on stakeholders.	I can analyse and apply at least one example to all of the following: the concept of economies of scale. I know the different types of economies of scale and how they impact on stakeholders.	I can analyse and apply 2 -3 examples to all of the following: the concept of economies of scale. I know the different types of economies of scale and how they impact on stakeholders.	I can confidently analyse and apply in relation to all of the following: the concept of economies of scale. I know the different types of economies of scale and how they impact on stakeholders.
AF4	Competitive and concentrated markets 1	I have knowledge of : market structures including perfect competition and monopoly and what is meant by a competitive market.	I can analyse and apply at least one example to all of the following: market structures including perfect competition and monopoly and what is meant by a competitive market.	I can analyse and apply 2 -3 examples to all of the following: market structures including perfect competition and monopoly and what is meant by a competitive market.	I can confidently analyse and apply in relation to all of the following: market structures including perfect competition and monopoly and what is meant by a competitive market.
GCSE Economics Term 3		Developing	Securing	Mastering	Excelling
AF1	Competitive and concentrated markets 2	I can analyse and apply at least one example to all of the following: the concept of competitive and non-competitive markets and their impact on stakeholders, the characteristics of labour markets	I can analyse and apply 2 -3 examples to all of the following: the concept of competitive and non-competitive markets and their impact on stakeholders, the characteristics of labour markets	I can confidently analyse and apply in relation to all of the following: the concept of competitive and non-competitive markets and their impact on stakeholders, the characteristics of labour markets	I confidently analyse and apply and am beginning to understand how to evaluate decisions in relation to all of the following: the concept of competitive and non-competitive markets and their impact on stakeholders, the characteristics of labour markets
AF2	Money	I can analyse and apply at least one example to all of the following: the characteristics of money and the functions of money	I can analyse and apply 2 -3 examples to all of the following: the characteristics of money and the functions of money	I can confidently analyse and apply in relation to all of the following: the characteristics of money and the functions of money	I confidently analyse and apply and am beginning to understand how to evaluate decisions in relation to all of the following: the characteristics of money and the functions of money
AF3	The Financial Sector	I can analyse and apply at least one example to all of the following: the importance of the financial sector -including the Bank of England, banks, building societies and insurance companies, interest rates, saving, borrowing and investment	I can analyse and apply 2 -3 examples to all of the following: the importance of the financial sector -including the Bank of England, banks, building societies and insurance companies, interest rates, saving, borrowing and investment	I can confidently analyse and apply in relation to all of the following: the importance of the financial sector -including the Bank of England, banks, building societies and insurance companies, interest rates, saving, borrowing and investment	I confidently analyse and apply and am beginning to understand how to evaluate decisions in relation to all of the following: the importance of the financial sector -including the Bank of England, banks, building societies and insurance companies, interest rates, saving, borrowing and investment
